

Some additional points to bring up in your plan:

- Make sure to include the status of the ethical permissions, if they are needed for your research (clinical research/animal research)
- Describe the datasets you are collecting
- Describe the methods you are using to collect the data
- Describe the statistical methods you are planning to use
- How are you planning to support yourself? Are you working full-time / part-time /on free time?
- How much time are you putting in your research?
- Your own role in the research. What are you planning to do yourself and who is helping you?
