

Patent databases and market information sources

Training sessions

Two identical training sessions at 8:30 – 11:30:

in Finnish 15th of March and in English 28th of March 2012

Avoid duplication of research efforts. Learn to use patent databases and market information sources when preparing the project plans, during the project and commercializing new technologies. Use patent databases as a regular part of your research.

Goal

The learning session will give you tools to follow up patent databases and present sources for market information.

To whom

For researchers, those who are planning the future research programme, and those who are going to apply external funding and those who are going to commercialize the research results.

Content and realization

You will perform searches directly from the databases of the patent authorities of European Patent Office (EPO), World Intellectual Property Organization (WIPO) and United States Patent and Trademark Office (USPTO). Also some sources for market information are shown.

The learning session will be held in IT class.

Place

DC-Åbo Gripens pc-klass

Åbo Akademi, Gripen

Hämeenkatu 13 B, 1 stair up

Please find Gripen, on the map <http://www.utu.fi/kartta/kartta.pdf>, building Å2, left and down.

How to enroll
