at the Department of Nursing Science, University of Turku, Finland

Pre seminars will be held at 12th and 19th November 2019.

International students can participate these seminars via Internet.

Instruction lesson to the course will be held on the 26.9, at 16–17

(Finnish time).

Summary of the course

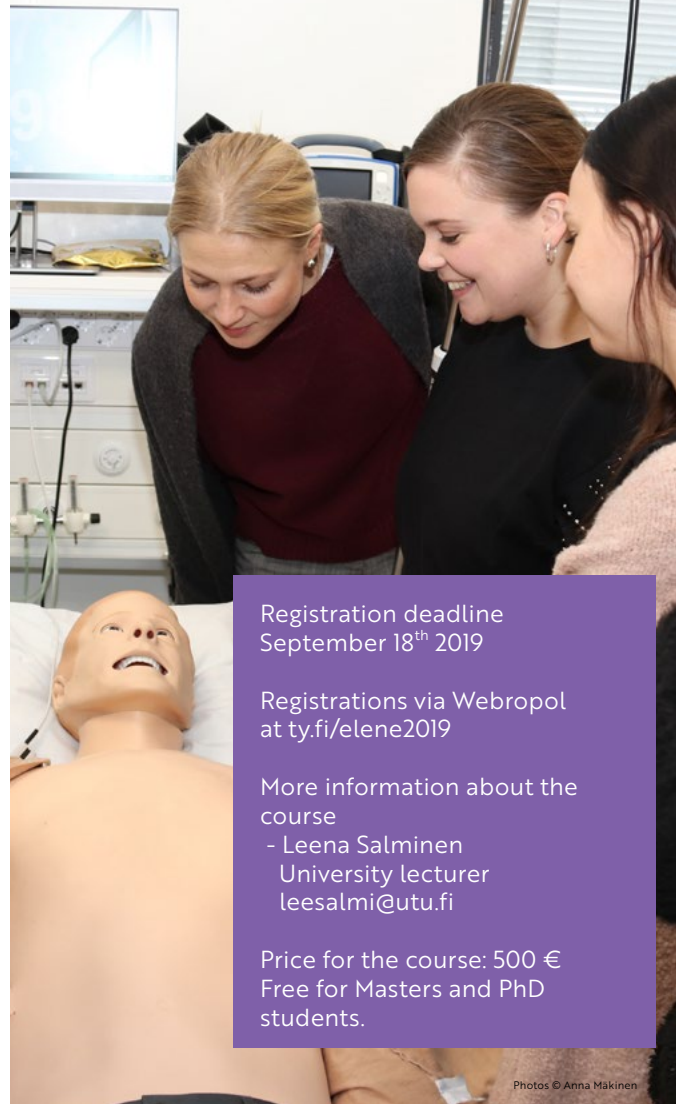

The aims are to bring together university students in different countries to ensure high quality nurse education related to evidence-based teaching and outcomes concerning social media as a learning environment in nursing education in multicultural European context.

Learning objectives are

1. To deepen understanding of new learning environments of social media
2. To learn to use co-operative teaching and learning methods in nursing education

The expected learning outcomes of the EleniP course are the competences of new e-learning environments especially of social media.

The bachelor qualification of health care is required.
The students should have sufficient English language skills.
