

Cancer Research Seminars – Fall 2020

1.9.2020 Kalle Mattila "Current treatment of melanoma and predictive markers of response"; Kimmo Kettunen "Conditionally reprogrammed cells in bladder cancer"
Online meeting (Zoom) at 3.00 – 4.15 pm

6.10.2020 **State-of-the-art methodologies in cancer research**
Online meeting (Zoom) at 1.00 – 4.30 pm

Session I

13.00-13.25 Riikka Lund "Supporting high-level research with state-of-the-art tools for genomics"

13.25-13.50 Christoffer Löf "The CRISPR toolkit in cancer research"

13.50-14.15 Mari Suominen "Learning curve for using CD34 engrafted humanized mice"

14.15-14.40 Tove Grönroos "New applications in animal PET/CT imaging"

Break

Session II

15.00-15.25 Pekka Ruusuvaara "Artificial intelligence for cancer diagnostics and grading"

15.25-15.50 Hongbo Zhang "Advanced Materials and Nanotechnology on Cancer Treatment"

15.50-16.15 Sofia Khan "Where lies the power of genome-wide association studies (GWAS)"

16.15-16.30 Discussion and closing

3.11.2020 Guillaume Jacquemet "Filopodia and the metastatic cascade"; Aleks Törnroos "Role of anti-cancer agent pharmacokinetics in individualised drug therapy"
Online meeting (Zoom) at 3.00 – 4.15 pm

24.11.2020, Breast cancer research seminar; program will be confirmed later
