

Health innovations - from ideas to impact in device development, 2 ECTS

Curious about merging
health and technology, and
creating innovative devices
for the healthcare sector?

This 6-week short online course provides an introduction to health device development. Participants will gain valuable insights into the different stages of the health device development process, while being provided with a unique platform for innovative thinking in an international and transdisciplinary environment. Cardiopulmonary resuscitation (CPR) will serve as a use case for innovation.

The course is open for all Moi, UWC and UTU master level students in the fields of health, biomedicine, medicine and technology.

Course is organised online, using Zoom and Moodle.

Course schedule

Week 37: Wednesday 13th September, 14.00-18.00*

Week 38: Monday 18th September, 14.00-18.00*

Week 39: Independent studying

Week 40: Monday 2nd October, 14.00-18.00*

Week 41: Independent studying

Week 42: Wednesday 18th October, 14.00-18.00*

*14.00-18.00 in Kenya and Finland (UTC+3), 13.00-17.00 in South Africa (UTC+2)
