JUHA RAUTIO

EACH SUSPICION
BEFORE THIS AND AFTER

sit there
and don't answer
we trust you
your eyes
your eyes are needed
your eyes are tempered glass
we need you
the world needs you
this and that to come
sit there and listen
to your inner voice
the truth that has always been you yourself
you make your own choices

examine things
watch the numbers
watch the letters
watch empty spaces
the pauses between them
draw your own conclusions
draw your own conclusions and explain them
explain them to us and to others
don't tell anyone
don't trust anyone
don't trust in anything, and
never things that come from outside

outside, where there are only black dots
punctuation marks that care not
I could give so many example of this
but they are all familiar to you
they are seen and heard every day
in politics and economics
nothing else can be seen
leading questions
put words in your mouth
thoughts in your head, emotions in your heart
only one question is important
what they are trying to sell you
watch the numbers, watch the traces of punctuation marks
their tracks, signs of what they don't want us to see
uncertainty is wilful
chance is baked into the game
the game is made to be won
and lost
there you'll find everything you need to know

choose the middle way
the true middle way
but don't choose it because
someone tells you to
anyone can see
if they want to see
what extreme thought, degradation
ideas should have the power to shake things up
like you have been shaken up
they should never break their bonds
sit down, inner voice
sit down and never forget that
the questioner doesn't really want to hear

things are complicated
science is not god

NASA says that the world is round
fluoride is added to drinking water, reptilian claims
nanotechnology and 7, 8 and 9G-already in use-which no one
wants to talk about
of course, things don't seem to have anything to do with each other
but you have to know how to read between the lines
hopefully, this is understood objectively
the media creates images by which so many live
now there are consequences to bear
most people have no
idea how the world works
slackening settles in
tiny slips from the straight and narrow reveal
how dumb they think people are

I wrote in my earlier message
that I've bought into the system
but in no way does this mean
that I would give up
I will not hold my tongue
I've sent mails off to all the ministers
and engage regularly in discussions with the UN
long discussions to which I still haven't
received any response
but who is surprised

I am a citizen
and my pseudonym is not Concerned
this country is sold
state funds impose debt
insurance companies and pension funds
full of blood money

language is a virus developed in a laboratory
those who developed an immunity
or who were never subjugated by language
are innately able to communicate telepathically
even this might be partly true
am I to keep quiet about this?
what do I know
whose interests does this serve
politically charged claims
which you should agree with without a shred of evidence
extraterrestrial test
a formally competent parasite
a joyous science with or without the tinfoil cap
a truth that thrives outside
an unreliable media
which assures us that things really aren't the way they look

open your ears and draw your own conclusions
I'm just telling it the way it is
desert peoples
world economic forum
paedophile satan worshippers and democratic pizza lizards
Duck Duck Go -> Operation lock-step
the power of suggestion and manipulation of the credulous
have always been easy
rationales and biased ideology
wake up
guilt is a weapon
lockdown
24 h surveillance

this should already be clear to everyone
don't send those signal invites
telegram has an encrypted connection
delete facebook delete google
no social media
I have never owned a smart phone
I buy prepaid phones from the convenience shop
buy with cash
and even with prepaid
there are risks
most of the time
it's best to keep the battery removed

only idiots talk about conspiracies
we're indoctrinated since birth
the elliptical force feeding of elites follows us throughout our youth
truth in quotation marks
truth in quotes
so-called truths
which we're forced to parrot
to keep the rhythm up and the herd happy
that the music still plays
sit down, draw your own conclusions
too few are prepared to question things
listen, sit down, how can it be
that most of the herd is just fine with this
that they're perfectly happy to go through life with
their eyes firmly closed
that electricity flows from the outlets
water from the faucet and food from the store
and the talking heads on the screen tell you how to think
truth in quotation marks
life in quotation marks
everything is interlinked
the so-called far right
the so-called conspiracies
quotes and quotation marks, important abbreviations
symbols flashing like a beacon
a blinkered life, a permanent smile
but the alarm clock is set

everything is interlinked
everything is truly
interlinked
impermeable air
transparent mass
there is no secret
a storm in ellipsis
and what comes after
no one knows, but at least it knows no calm
did you read the article I linked
icefishing data
share this, please share this on your own wall
read this before everything is over

in the light of new evidence there should be further investigation
there are things that cannot be known
before you realise that you know
follow the money
fiat money, cannabis and unemployment
mentioned
and the shots mentioned taken behind millions of screens
no one know who benefits and why
before you want to know
the result is prescribed
disagree agree what do you think
and who cares

washed over with silver water
actual inflation is already 110%
but you shouldn't say this aloud
your phone is recording everything you say
it's in their playbook
even before the foreword
hunched down after this truth
a sequence of numbers in a grey mass
a combination of letters in a pizzeria basement
money talks in the world
and hypodermic needles in the skin of the credulous
dance like bill gates
just look at those moves
farewell basic trust and children's names on headstones
narratives where opinions are twisted into facts
oh, have you heard this one?
leading question, absurd question and a so-called question
fished in, everyone filling their baskets

we trust you
your circulation still surges
pure and natural
and you there, I can hear your laughter
but your smile surely does chill
when the needle is then thrust into the beast
when there is no intact place for babies or grandfathers
and what happens when there are no intact places
for plants, mushrooms, protists
do we then move on to machines
and who does it benefit
I pity all those who accept this as true
if I were to emerge from a coma after a few years and
I turned on the news
I would scarcely believe I was living in Finland
but am I even now living
a so-called life
life in quotation marks
when there is no news of real things
the media goes mute, politicians look the other way
and whether Columbus was an American
just to name one

each question
each thought
before this
after this
you trust me, right?
oh, how I need this
this place
and that my eyes are essential
the silent thrum of my pulse
for years I have illustrated the point
drawn storms
listen, you are not an example,
listen, you are an exception
I don't believe in anything
you don't believe in anything
it links us
not just anything will get through
we trust you
your eyes are tempered glass
we need you
each question
each thought
each suspicion
before this and
after
