

The supervision plan

In the supervision plan, the supervisor and the doctoral student together set goals for their annual work and outline how the supervision will be arranged in practice during the next year. The supervisor and the doctoral student draft the supervision plan together. The supervision plan should be based on the plan for completing the degree and the working plan and the schedule of the dissertation.

The concrete goals set in those plans should be translated into supervisee and supervisor commitments in the supervision plan.

The supervision plan includes:

- 1) concrete goals for dissertation work and the drafting of other academic texts
- 2) other concrete goals concerning the annual work of the doctoral student
- 3) dates and times of the supervisory meetings for the next academic year.
